

Pharmacy Breakout Sessions Offered at 11th Armenian Medical World Congress

The 11th Armenian Medical World Congress (AMWC) will be offering Pharmacy Breakout Sessions featuring Pharmacy professionals sharing their knowledge and experience on important issues facing the field today.

“Teamwork among healthcare professionals is an essential attribute to improve patient care,” says Arsine Kalfayan, PharmD, CME Chairperson and Co-Chair of the Pharmacy Breakout Sessions of the 11th AMWC. “The congress is offering a great opportunity for different disciplines to gather under one roof to learn from each other, socialize and build relationships.”

Topics of the Breakout Sessions will include:

- Impact of Medication Therapy Management on High Risk Medicare Patients at San Francisco Community Pharmacies
- Mechanisms of Adverse Drug Reaction Monitoring, Detecting, and Reporting in an Acute Care Community Hospital
- Assessing the Impact of a Pharmacist Intervention on Oral Antineoplastic Adherence Rates
- Intravenous Iron Utilization During Epoetin Therapy in Anemia of Chronic Kidney Disease
- Controlled Substance Loss or Theft – PIC Your Nightmare
- Sex Hormone Therapy Using Compounded Pharmacotherapeutic Options
- Navigating Health Care Reform

“As a pharmacist practitioner, having current knowledge, skills and clinical training is essential to provide high quality Medication Therapy Management and obtain the best outcomes for your patients,” states Silva Gasparian, PharmD, Co-Chair of the Pharmacy Breakout Sessions of the 11th AMWC.

Pharmacists attending the AMWC will be eligible to receive 20 Continuing Medical Education credits.

Advanced registration pricing ends on May 1, 2013. To register for the 11th AMWC, please visit our website at www.aamsc.com/congress.
