

AAMS 32nd Anniversary Gala Celebration to Benefit Health Programs of Our Children

Thanks to generous donors such as you, thousands of Armenian children who suffer from the debilitating and potentially deadly diseases of epilepsy and diabetes will continue to receive essential healthcare services that would otherwise be unavailable to them. Through our Pediatric Epilepsy Project, thousands of Armenian children with seizures will continue to receive vital diagnostic and treatment through state-of-the-art diagnostic equipment and necessary medications. Your support will also enable the AAMS to continue to assist with an annual summer camp for children with juvenile diabetes, where they can receive care and education, have fun and just be kids. These programs are often the only access they will have to the resources they need.

As a sponsor of our Gala, you can help us continue to offer these services so that these children can lead healthy and productive lives.
