

Armenia is facing a third surge of the pandemic (with more surges forecasted later this year.) The amount of oxygen flow that's being provided to COVID patients are sometimes limited to about 10% of what is actually necessary to effectively treat sick COVID patients. Armenia's current oxygen generating equipment at Yerevan's Physics Institute serves the entire nation of Armenia, but is failing, obsolete and can't keep up with these demands. The new generator will be able to produce twice as much oxygen than the current system (40% of the entire country's need). We need your help! Please donate to the Cryogenic Center/Oxygen Generator System fund, for the installation of new equipment, so Armenia can breathe better and easier.

Breath of Life

FUNDRAISER

Non-COVID patients may receive six liters of oxygen per minute. COVID patients need 60 to 80 liters a minute. Armenia's COVID -19 cases are surging. Their oxygen supply is dwindling due to aging equipment. Your gift will help Armenia breathe easier.

Help us reach our goal of raising \$250,000 to support Armenia's Cryogenic Center/Oxygen Generator Project, oxygen delivery methods and COVID-19 therapies.

Please join the AAMS
May 23, 2021 | 4:00 to 7:00 P.M.
The Roof: 3341 Cahuenga West Blvd.
Los Angeles, CA 90068

Wine and hors d'oeuvres will be served.

Convenient parking is available across the street at 3330 Cahuenga for a \$5 flat fee.

RSVP at info@aamsc.org or (818) 980-7777

You can donate at: www.aamsc.org/make-a-donation/

This is an in-person event and will also be broadcast live on:
